

Mesa Provides Solar Solutions Across California, Arizona, and Nevada.

Nine Major Markets Served:

- » Commercial/industrial
- » Cold storage
- » Healthcare
- » Education
- » Religious institutions
- » Wineries
- » Data/call center
- » Institutional
- » Public/government

Solar Services Include:

- » Project development
- » Site feasibility studies
- » System design and energy simulations
- » Rate analysis and savings calculations
- » Project economics
- » Tax credit and rebate estimates
- » Roof structural loading analysis
- » Project financing solutions
- » Utility interconnection
- » Design/build project construction
- » Ongoing system monitoring and maintenance

Long-term Solar Investments need Long-term Solar Partners.

For over 35 years, EMCOR Services Mesa Energy (Mesa) has provided clients with high-quality energy systems and services, including those related to mechanical, commercial HVAC, building automation, energy efficiency, and solar power systems.

Armed with decades of knowledge and experience, the Mesa team of specialists can take on virtually any mechanical challenge that arises. Mesa's expert advice on energy solutions often helps clients to reduce energy consumption, improve the environment, and lower energy costs. From commercial refrigeration repair and chiller services, to innovative renewable energy solutions, Mesa's qualified, certified technicians are ready to assist clients with a full suite of mechanical, HVAC, and solar solutions.

Expert Solar Energy Advice. Experienced Solar Energy Service.

Solar is a long-term investment and clients need a reliable, long-term partner. Mesa's solar services provide clients with innovative renewable energy solutions that can be customized to satisfy unique power requirements while also helping to lower energy costs.

A Custom Energy Solution—designed with Clients in Mind.

Mesa offers a range of solar services, including consulting, installation, and maintenance, designed to help clients take full advantage of a popular source of renewable energy—solar. Mesa's expert solar consultants work with clients to specify their energy requirements and create customized strategies that meet power and budget needs. Then, in partnership with leading-edge manufacturers, Mesa helps design a solar solution that meets even the most rigid quality standards. Clients get the energy needed for efficient facility operation, while also maintaining a comfortable and productive environment at a lower cost.
